

Student Expense Tracker using Loops

Created by

Arnel Amor-II H. Oco

Program Description

This Python program allows a student to continuously enter daily expenses. The program uses loops to repeat the process and computes the total expense and average expense.

The user can type "done" to stop entering values.

Concepts Used

- While Loop
- For Loop
- break
- continue
- Variables
- User Input
- Type Conversion
- Conditional Statements
- Comments

Objective

The objective of this program is to demonstrate how loops and iteration work in Python using a practical real-life situation.

```
In [ ]: # =====  
# Program Title: Student Expense Tracker using Loops  
# Created by: Arnel Amor-II H. Oco  
#  
# Description:  
# This program accepts multiple expenses from  
# the user until "done" is entered.  
# It computes total and average expenses.  
# =====  
  
# Create an empty List  
expenses = []
```

```

print("Enter your daily expenses.")
print("Type 'done' to finish.")

# Repeatedly ask user input
while True:

    entry = input("Expense: ")

    # Stop the Loop
    if entry == "done":
        break

    # Ignore blank inputs
    if entry == "":
        continue

    try:
        value = float(entry)

        # Add value to List
        expenses.append(value)

    except:
        print("Please enter numbers only.")

# Initialize variables
count = 0
total = 0

# Definite Loop
for amount in expenses:
    count = count + 1
    total = total + amount

# Compute average
if count > 0:
    average = total / count
else:
    average = 0

# Display results
print("\n===== Expense Summary =====")
print("Number of Expenses:", count)
print("Total Expense:", total)
print("Average Expense:", average)

print("Thank you for using the Expense Tracker.")

```

Enter your daily expenses.
Type 'done' to finish.

Sample Output

Enter your daily expenses.

Type 'done' to finish.

Expense: 100 Expense: 50 Expense: 80 Expense: done

===== Expense Summary =====

Number of Expenses: 3

Total Expense: 230.0

Average Expense: 76.67

Thank you for using the Expense Tracker.
